Topic: The ethics of eating meat

Play this video and answer the following questions:

<https://www.youtube.com/watch?v=JAYuHIthHco>

- 1. If all farmed animals and desire to eat meat disappeared overnight, by approximately how much would food-related greenhouse gas emissions drop initially?**
 - A. About 63%
 - B. About 25%
 - C. About 80%
 - D. Less than 10%
- 2. Which immediate economic effect does the video say would occur when demand for fruits, vegetables, and legumes rises?**
 - A. Produce prices fall immediately worldwide
 - B. There is no change in food prices
 - C. Meat becomes more expensive than vegetables
 - D. Produce costs soar due to short supply
- 3. According to the video, which region is given as an example where a sudden lack of meat would leave people with little to eat because of a harsh growing environment?**
 - A. Pacific Northwest (USA)
 - B. Mongolia
 - C. Amazon Basin
 - D. Mediterranean coast
- 4. The video states that beef and dairy production are responsible for over what share of food-based emissions, while providing around 18% of the world's calories?**
 - A. Over 20%
 - B. Over 40%
 - C. Over 60%
 - D. Over 80%
- 5. Which of these long-term environmental or health effects does the video claim could result from greatly reduced meat consumption?**
 - A. More pesticide use and reduced biodiversity
 - B. Increased rates of heart disease and cancer
 - C. Many ocean species rebound and insect-pollinated crops yield more
 - D. Immediate loss of all agricultural jobs worldwide

Answer Key:

1. A
2. D
3. B
4. C
5. C
